

Unit 5 Packet Pacing Guide

Vocabulary

- Quiz will be on Monday 11/7 for all terms in this unit
- There are 15 terms for this unit, recommended pacing is 3 terms per night over 5 days.

Essential Questions- These will be hard to answer until the unit is nearly complete, I suggest competing vocabulary and Document Analysis first

1. This question is asking you to name and explain how nations like Great Britain obtained raw materials through imperialism (taking of colonies) and using those resources in the factory system and Industrial Revolution. Try to include a vocabulary term from a previous unit for how imperialist nations such as Great Britain used their colonies for economic gain.

You should be able to complete this around 11/7

2. This question is asking you to explain how the desire for resources led to competition for colonies and rivalries that would develop among nations over these imperialistic actions.

You should be able to complete this around 11/8

3. This question is asking you to first say what culture is (should have learned this in previous grades) and how it can unite a group of people and how it can divide people. Use examples of how and why Europeans imposed their culture upon people in Africa and Asia.

You should be able to complete this around 11/9

Document Analysis

-This can be done around 10/31

-Make sure you do not write in any of your responses in this section that the document was created to inform students
